

Protection-as-a-Service

Protecting APIs and Applications From Threats – Everywhere, All the Time

Keep Attackers at Bay Without Lifting a Finger

More than just software. More than just managed services. ThreatX is people-powered threat protection that takes the worrying off your plate for good.

Organizations often struggle to find the time and talent needed to meet the daily demands of security and keep pace with advancing threats. That's why ThreatX provides a dedicated team of highly trained experts who continuously focus on the API and application threat landscape and its impact on our customers.

Through the ThreatX Protection-as-a-Service (PaaS) offering, our team of security experts provide 24x7 proactive monitoring and streamlined threat response. Our team partners with your security staff to ensure you are informed and confident that your APIs and applications are protected.

Let Our Experts Do the Worrying for You

Your applications can be attacked at any time, day or night. ThreatX understands the need to always have resources ready to respond – but it doesn't have to be you! The ThreatX PaaS team manages the day-to-day administration of the ThreatX platform, working alongside your security team to meet the needs of your environment and organizational goals. The ThreatX team of experts continuously tracks threats and takes action while working with ThreatX Labs researchers to stay up to date on the latest trends and zero-day vulnerabilities, ensuring your APIs and applications are protected – everywhere, all the time.

Key Features

- » Fully managed API & app protection
- » 24/7/365 support at your fingertips
- » Proactive threat hunting & incident response
- » Zero-day protection backed by research
- » Custom defenses to match your business needs

Get your nights and weekends back with ThreatX managed API and app protection:

- » **Unburden your team** – Offload tier 1 and tier 2 operations to our experts, giving your team back time and availability.
- » **Force multiplier** – Refocus security resources to other mission-critical projects while improving your risk posture with ThreatX's dedicated PaaS team focusing on API and app threat response.
- » **Partnership** – Lean on the ThreatX team for managed API and app protection, onboarding support, one-on-one API/app consulting, and custom defenses.

Protection-as-a-Service

Today's attackers are creating smarter, more advanced attacks that are harder to detect. ThreatX's Protection-as-a-Service offering helps our customers stay ahead of complex attacks – relieving the stress of having to do it themselves.

How It Works

24/7/365 support at your fingertips

- » Attacks happen at any time, day or night, and ThreatX recognizes that the availability of your APIs and applications is paramount. We commit to responding to urgent situations our customers raise within minutes 24x7x365 and working until the situation is resolved.

Proactive threat hunting

- » ThreatX detects attackers by analyzing risk from every angle based on how each potential attacker interacts over time – not just in a single event. **The PaaS team monitors for increases in traffic, match events, or blocked requests and takes action when they are detected. All incidents are verified, analyzed, and prioritized to ensure fast response for incidents that need it the most.**

Zero day protection

- » Stopping zero-day threats requires more than just software; you need real live people, but it doesn't have to be you. The ThreatX PaaS team continuously monitors for new and existing vulnerabilities that can affect customer applications. When new, relevant CVEs are published, ThreatX notifies customers and provides short- and long-term patching recommendations.

Custom defenses & countermeasures

- » ThreatX provides customized countermeasures and mitigation policies uniquely tailored to the customer environment. These policies can be generated on-demand in response to newly detected threats or can be generated based on PaaS team recommendations and business requirements unique to the application or environment.

Try It for Yourself

Ready to stop threats and get more time back in your day?

Take the next step. Request a demo today and see how you can effortlessly protect your APIs and apps against today's sophisticated threats while reducing the burden on your security team.
