Product(s): The ThreatX Platform

Overall Comment: "Of all of the 3rd party services we use, this is one of the ones that I have the most confidence in."

Lessons Learned

What do you like most about the product or service?

I never feel like I need to babysit the service, it's very rare that we get a false positive and in those cases where we do, support is responsive and capable.

What do you dislike most about the product or service?

Some more complex rule configurations require support to implement. The current UI is functional, but needs to be more flexible.

Evaluation & Contracting

Why did you purchase this product or service?

- Improve compliance & risk management

What were the key factors that drove your decision?
