## "Finally, An Effective WAF That Is Straightforward To Deploy And Maintain!"

Submitted: May 7, 2021

★★★★★    **Overall User Rating**    **Report Inappropriate Content**

**Product(s):** The ThreatX Platform

**Overall Comment:** "This is a WAF that is easy to deploy and manage! They were with us every step of the way, and they were great partners throughout the evaluation process. They even stopped some threats while we were merely testing the platform. They were willing to do custom work to integrate into our ITSM platform."

## Lessons Learned

### What do you like most about the product or service?

1) Ease of deployment. Much of the work can be done with DNS. 2) Ability to process by URL. This keeps our IAM and SAML intact while still allowing detection and prevention of attacks. 3) Sorts incoming threats according to the Mitre ATT&CK framework.

### What do you dislike most about the product or service?

1) Lack of name recognition. Many company leaders feel the need to be protected by a recognized brand name. This will improve over time as they get more customers. 2) Connecting to our IT Service Management tool was a custom development effort

## Evaluation & Contracting

### Why did you purchase this product or service?

- Improve compliance & risk management

### Reviewer Profile

**Information Security**

**Industry:**
Media and Publishing

**Role:**
Security and Risk Management

**Firm Size:**
10B - 30B USD
