Product(s): The ThreatX Platform

Overall Comment: "This product was easy to use and was able to accomodate our security WAF needs for our tech stack. We leverage the tool for web protections and mitigations against security threats. We do gain significant insights from the data we get from ThreatX and have applied some configuration changes based on that data to help us prevent threats and be more streamlined. "

Evaluation & Contracting

Lessons Learned

What do you like most about the product or service?

The dashboard is very easy to use and understand. Reporting can be self-service but also can be provided monthly automatically. The SOC analysts provided with the technology has been a great resource for my team.

What do you dislike most about the product or service?

Nothing at this time. I've been happy with the product and services.

Evaluation & Contracting

Why did you purchase this product or service?

- Improve compliance & risk management
- Create internal/operational efficiencies
